### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below in order to correct minor errors in claim syntax. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Allison M. Tulino (Reg. No. 48,294) on October 18, 2004.

In claim 5, line 15 change "reaches a predetermined count value," to --reaching a predetermined count value,--.

In claim 11, line 1 change "The jet recording apparatus" to --The ink jet recording apparatus--.

### **Additional Prior Art**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Suzuki US 6,334,658 is cited for teaching an ink supplying mechanism in which both an ink level detection and an ink consumption count is performed. However, similarly to Cook '664 the level detection and consumption counter are not directly used to control the supply but instead are first used in a comparison operation to determine whether a maintenance operation is to be performed.
